The graphic features the text 'Knowledge Innovation® P7 Blueprint' overlaid on a blurred background of a stock market chart with the word 'EXCHANGE' visible. The 'P7' is highlighted in yellow.

Knowledge Innovation® P7 Blueprint

- **Purpose**: for a shared understanding the trends of the Knowledge Economy and determining the TKL implications for the enterprise.
- **Principles**: to examine the principles, architectural considerations and options for action-based strategies for enterprise planning.
- **Process**: to perform a systematic gap analysis of the relative strengths and weakness of the enterprise and create an integrated knowledge strategy and projects to affect high-performance.
- **Performance**: to gain an understanding of which drivers and influencing variables are most germane and - if established - would yield expected standards of results, and to put the plan in motion.
- **Policies**: to revisit existing policies to stimulate more effective the knowledge-based economic and financial policies to foster human and technical communications across boundaries and result in more efficient and effective innovation practices.
- **Practices**: to establish bench-learning, (i.e., learn from the best), to transfer those insights into the leadership and to be able to map and visualize the knowledge innovation gained.
- **Prosperity**: to create mechanisms to ensure constant iteration of new products and services to meet constituent needs while maintaining an innovative competitive positioning.
